

PROGRESS UPDATE | OCTOBER 4, 2024 | SPRINT 1

SPRINT 1 (3/3) * 100 = 100%

PROJECT PERCENTAGE COMPLETION (3/37) * 100 = 8%

SPRINT 1 – focuses on laying the foundation of the system by working on the core design components. The team will create the initial UI/UX mockups to visualize the user interface and flow, with a user-friendly design. Alongside the Entity Relationship Diagram (ERD) will be developed to define how data will be structured and connected, database schema design will be prepared, translating the ERD into a concrete database structure that will support for future development

What went well: All task has been completed and each of us cooperate to each individual task we have

What could be improve: I think the UI/UX, there are some design that needs to be improve and we still can't manage on how can we improve it.

What needs to be done: We need to prepare for the next sprint and think what are the actions we need to do and set a time on it.
