

PROGRESS UPDATE | NOV 15, 2025 | SPRINT 7

SPRINT 7 (0/3) * 100 = 0 %

PROJECT COMPLETION = (17/38) * 100 = 44%

SPRINT 7 – Focuses on enhancing the privacy and sharing functionalities of the flashcard system. In this sprint, users will be able to share their reviewers with other users as well as set their reviewers to private to control who can access their study materials.

What went well: We have completed all the backend endpoints and are currently working on several components. During deployment, we discovered that our previous web host does not support Spring Boot, so we switched to a VPS on Hostinger, which allows us to fully customize our server environment.

What could be improved: The successful completion of each sprint is made possible by the collaboration of every team member and our openness with one another, especially when someone needs clarification or doesn't understand something.

What needs to be done: Connect our front-end on our backend and also customize our server environment.
