Sprint 7	Not started	11/15/2025	Implement public/private reviewer settings / Share reviewer / Access control logic for reviewers

SPRINT 6 $(0/3) * 100 = 0\%$

PROJECT COMPLETION $(12/37) * 100 = 32\%$

SPRINT 6 – Sprint 6 focused on quiz creation functionality, it composed of front-end and endpoint of the quiz functionality.

What went well: We manage to create the user authentication endpoint register, we create some of the components and we solve the problem on our database schema.

What could be improved: The completion of the task, some of the task on the sprint are not getting followed, that's why the completion of the task per sprint is getting carried over by the next sprint.

What needs to be done: Create all the endpoint for Quiz, Flashcard and also finish all the component pages.
