

PROGRESS UPDATE | December 13, 2025 | SPRNT 11

SPRINT 11 (3/3) * 100 = 100%

PROJECT COMPLETION (31/38) * 100 = 81%

SPRINT 11 - is centered on building and refining the User Dashboard, which will serve as the main control center where users access personalized information, monitor their activities, and interact with system features.

What went well: We successfully resolved the Quiz Set endpoint, Flashcard Set endpoint, and Posting endpoint, and all are now fully integrated with our front-end. Several UI components were also adjusted to align with the recent UI/UX improvements, ensuring a smoother and more consistent user experience.

What could be improved: We are continuously evaluating and refining our UI/UX design to determine what works best for our users. Our focus is on identifying the most intuitive, user-friendly, and efficient interface to ensure a smooth and accessible experience for all users.

What needs to be done: We plan to implement the notification functionality, integrate a profanity filter API, and add a Contact Us feature that will send user inquiries directly to our email.
