# PROGRESS UPDATE | OCTOBER 11, 2025 | SPRINT 2

SPRINT 2 (3/3) * 100 = 100 %

PROJECT PERCENTAGE COMPLETION (6/37) * 100 = 16

SPRINT 2 - This sprint focuses on the technical foundation of the project. The team worked on defining the **API specification document**, setting up the **tech stacks**, and establishing **workflows** to ensure smooth collaboration and system integration. All tasks were completed successfully within the scheduled period.

What went well: We manage to complete all the task and also each of us collaborate.

What could be improved: I believe we can submit our tasks earlier if we're able to complete each assigned task ahead of schedule.

What needs to be done: We need to prepare for the next sprint.
